

Night Owl Wireless, LLC is a family owned WISP that has coverage in the rural areas of Scott, Muscatine & Cedar County. When we first started we only offered 1Mb / 512Kbs service, as we have grown so has our bandwidth offering without added cost to our customer base. We are finding it harder to offer higher bandwidth in a setup where our Backhauls & APs have adequate spectrum. Buying spectrum at an auction not practical for us since are pockets are not as deep as the Cell Carriers. With ANY spectrum we can receive we will only keep raising our customers "speeds". If we could offer 25,100,300,500,1024 we would and for under \$100
